**ADVICE 1529-E-B**  
**(U 338-E)**

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA  
ENERGY DIVISION

**SUBJECT:** Supplement to Advice 1529-E-A Regarding Replacement of  
Schedule PX - Power Exchange Energy with Schedule PE –  
Procured Energy and Establishment of the Procured Energy  
Charge and Procured Energy Credit

**PURPOSE**

This advice filing supplements in part Advice 1529-E and Advice 1529-E-A to:  
(1) revise and include Schedule DM to change all relevant references from Power Exchange (PX) to Procured Energy (PE); (2) correct an error in the display of the proposed Procured Energy Credit on the Direct Access (DA) and Non-DA sample bills; (3) include revised wording as it was originally intended in Advice 1529-E-A for both sample bills' Footnote 1 found on the second page of the sample bill; and (4) include Energy Statement, Form 14-574, Formats A.1 through L.1 to display the reference change from PX to PE. The changes herein are minor in impact and consistent with the intent and description of changes in Advice 1529-E and 1529-E-A.

**BACKGROUND**

On April 5, 2001, SCE filed Advice 1529-E which proposed to withdraw Schedule PX, Power Exchange Energy, and establish and replace it with Schedule PE, Procured Energy. Further, Advice 1529-E: (1) modified the Procured Energy Cost calculation on an interim basis to reflect SCE's termination of energy procurement from the PX and the current state of the power market; (2) revised tariffs to change all relevant references from PX to PE and (3) suspended Schedules RTP-3 and RTP-3-GS.

On April 18, 2001, SCE filed Advice 1529-E-A to supplement in part Advice 1529-E. Advice 1529-E-A requested California Public Utilities Commission (Commission)

authorization to modify SCE's customer Bill Formats where the Procured Energy Charge information is provided.

This advice filing includes Schedule DM, and Form 14-574, Formats A.1 through L.1, which were inadvertently omitted from Advice 1529-E, as well as correctly displaying the proposed Procured Energy Credit on sample bills.

This advice filing will not increase any rate or charge for bundled service customers, cause the withdrawal of service, or conflict with any other schedule or rule.

### **EFFECTIVE DATE**

In compliance with the FERC Order, and consistent with the the tariff changes described in Advice 1529-E which requested an effective date of January 19, 2001, SCE requests that this advice filing become effective on that same date.

### **NOTICE**

Anyone wishing to protest this advice filing may do so by letter via U.S. Mail, facsimile, or electronically, any of which must be received by the Energy Division and SCE no later than 20 days after the date of this advice filing. Protests should be mailed to:

SPECIAL CONDITIONS (Continued)

12. Billing: A Customer's bill is first calculated according to the total rates and conditions above. The following adjustments are made depending on the option applicable to the customer.
- a. Bundled Service Customers receive supply and delivery services solely from Edison. The Customer's bill is based on the total rates set forth above. The Procured Energy (supply) component is equal to the Averaged Procured Energy (PE) Charge as set forth in Schedule PE. (C)  
| (C)
  - b. Direct Access Customers purchase energy from an Energy Service Provider and continue receiving delivery services from Edison. The Averaged PE Charge is determined as specified for a Bundled Service Customer. The customer's bill will be calculated as for a Bundled Service Customer, but the Customer will receive a credit for the Averaged PE Charge. (C)  
(C)
  - c. Hourly PE Pricing Option Customers receive supply and delivery services solely from SCE\*. A Customer taking Hourly PE Pricing Option service must have an interval meter installed at its premises to record hourly usage, since PE Costs change hourly. If such metering is not currently installed, it shall be installed at the Customer's expense before Hourly PE Pricing can be provided. Edison's charges for such metering are determined as set forth in Rule 2. The bill for a Hourly PE Pricing Option Customer is determined by calculating the bill as if it were for a Bundled Service Customer, then crediting the bill by the amount of the Averaged PE Charge, as determined for Bundled Service and Direct Access Customers, then adding the hourly PE Cost amount which is determined by multiplying the hourly energy used in the billing period by the hourly PE Cost determined as set forth in Section 1 of Schedule PE, and the appropriate hourly Line Loss Adjustment Factors as set forth in Section 3 of Schedule PE, and the Uncollectibles expense factor of 1.00313. |  
|  
(C)
- \* In consideration of the cessation of the California Power Exchange as an available market for an hourly pricing standard, the Hourly Pricing Option is suspended. (N)  
(N)
13. Generation Charge: The generation charge is calculated based on the total rate less the sum of: Distribution, Transmission, Public Purpose Programs, Nuclear Decommissioning, and Fixed Transition Amount (where applicable) charges, the Transmission Revenue Balancing Account Adjustment (TRBAA), and the Public Utilities Commission Reimbursement Fee. The Competition Transition Charge (CTC) is calculated residually by subtracting the Averaged PE Charge calculated as set forth in Schedule PE from the generation charge (See Rate Components Table in Schedule D). (C)  
(C)
14. Negotiating of CTC Payment Method: Nothing in this rate schedule prohibits a marketer or broker from negotiating with Customers the method by which their Customer will pay the CTC.

Emergency Procurement Surcharge	5.04
Other Charges	(6.13)
<b>Current Amount Due</b>	<b>\$ 12.11</b>

- (1) *The Energy Charges reflect the amount included in your rate for recovery of energy procurement and generation costs. This service is subject to competition. You may purchase electricity from another supplier.*
- (2) *A portion of historic electric generation costs has been financed through low-cost bonds to reduce your total bill by 10%. The TTA reflects the costs of these bonds, which are less expensive than the type of financing the utilities previously employed. The TTA does not offset your 10% rate reduction, nor does it increase the total amount you otherwise would have paid.*
